Notes to the Financial Statements

1. Significant Accounting Policies

(i) Reporting entity and statement of compliance

These financial statements are for the Banking Group for the three months ended 31 December 2011. They have been prepared in accordance with the requirements of *NZ IAS 34 Interim Financial Reporting* and the Order, and should be read in conjunction with the Banking Group's financial statements for the year ended 30 September 2011.

(ii) Basis of measurement

These financial statements have been prepared on a going concern basis in accordance with historical cost concepts except that the following assets and liabilities are stated at their fair value:

- derivative financial instruments, including in the case of fair value hedging, the fair value of any applicable underlying exposure;
- financial instruments held for trading;
- financial assets treated as available-for-sale; and
- financial instruments designated at fair value through profit and loss.

Insurance policy assets are measured using the Margin on Services basis, and defined benefit obligations are measured using the Projected Unit Credit method.

(iii) Changes in accounting policies

The accounting policies adopted by the Banking Group are consistent with those adopted and disclosed in the previous full year Disclosure Statement.

(iv) Presentation currency and rounding

The amounts contained in the financial statements are presented in millions of New Zealand dollars, unless otherwise stated.

(v) Comparatives

Certain amounts in the comparative information have been reclassified to ensure consistency with the current period's presentation. This includes reclassifying certain investment assets that relate to the insurance business from due from other financial institutions and available-for-sale assets to investments backing insurance policyholder liabilities to better reflect the purpose for which the assets are held.

(vi) Principles of consolidation

The financial statements consolidate the financial statements of the Bank and its controlled entities.

2. Operating Income

Other operating income includes a fair value gain of $79 million (31/12/2010 $38 million loss; 30/09/2011 $99 million loss) on the revaluation of financial assets and liabilities designated at fair value and on hedging activities. Other operating income excluding these fair value adjustments is $124 million (31/12/2010 $121 million; 30/09/2011 $460 million).

Notes to the Financial Statements

3. Segmental Analysis

For segment reporting purposes, the Banking Group is organised into three major business segments - Retail, Commercial and Institutional. Centralised back office and corporate functions support these segments. These segments are consistent with internal reporting provided to the chief operating decision maker, being the Bank's Chief Executive Officer.

Segmental reporting has been updated to reflect minor changes to the Banking Group's structure. Comparative data has been adjusted to be consistent with the current period's segment definitions.

Retail

Retail provides banking products and services to individuals through separate ANZ and The National Bank of New Zealand branded distribution channels. Personal banking customers have access to a wide range of financial services and products. Retail contains the Banking Group's wealth businesses which includes private banking and investment services provided to high net worth individuals, the OnePath wealth management and insurance businesses, and other investment products. This segment also includes other profit centres supporting the Retail segment.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking services are offered to small enterprises (typically with annual revenues of less than $5 million). Commercial & Agri customers consist of primarily privately owned medium to large enterprises. The Banking Group's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

Institutional

Institutional provides financial services to large multi-banked corporations, often global, who require sophisticated product and structuring solutions. The Institutional business unit includes the following specialised units:

- Markets - provides foreign exchange, interest rate and commodity trading and sales-related services, origination, underwriting, structuring, risk management and sale of credit and derivative products globally;
- Transaction Banking - provides cash management, trade finance and international payments;
- Specialised Lending - provides origination, credit analysis, structuring and execution of specific customer transactions.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

Total capital requirement	130,384	66,940	5,355

[1] Total credit risk weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration.

The Banking Group previously recorded a Supervisory adjustment to the risk weighted exposures of its residential mortgage portfolio as required under the Conditions of Registration applying at the time. Following RBNZ approval of the Bank's mortgage capital model this Supervisory adjustment is no longer required.

Pillar II capital for other material risks

The Banking Group has an Internal Capital Adequacy Assessment Process ("ICAAP") which complies with the requirements of the Bank's Conditions of Registration.

Under the Banking Group's ICAAP it identifies and measures all "other material risks", which are those material risks that are not explicitly captured in the calculation of the Banking Group's tier one and total capital ratios. The other material risks identified by the Banking Group include business risk, pension risk, insurance risk, premises and equipment risk and capitalised origination fees risk.

The Banking Group's internal capital allocation for these other material risks is $368 million (31/12/2010: $332 million; 30/09/2011: $317 million).

Retail mortgages by loan-to-valuation ratio ("LVR")

As required by the RBNZ, LVRs are calculated as the current exposure secured by a residential mortgage divided by the Banking Group's valuation of the security property at origination of the exposure. Off balance sheet exposures include undrawn and partially drawn residential mortgage loans as well as commitments to lend. Commitments to lend are formal offers for housing lending which may or may not be accepted by the customer.

As at 31/12/2011 (Unaudited)

$ millions	On-balance sheet	Off-balance sheet	Total
LVR range			
0% - 59%	17,183	3,152	20,335

Over 90%	3,390	281	3,671

12. Concentrations of Credit Risk to Individual Counterparties

The Banking Group measures its concentration of credit risk in respect to bank counterparties on the basis of approved exposures and in respect to non-bank counterparties on the basis of limits.

For the three month period ending 31 December 2011 there were no individual counterparties (excluding connected parties, governments and banks with long term credit ratings of A- or above) where the Banking Group's period end or peak end-of-day credit exposure equalled or exceeded 10% of the Banking Group's equity (as at the end of the period).

13. Insurance business

The Banking Group conducts insurance business through companies in the OnePath Insurance Holdings (NZ) Limited group. The aggregate amount of insurance business in this group comprises assets totalling $470 million (31/12/2010: $335 million; 30/09/2011 $438 million), which is 0.4% (31/12/2010: 0.3%; 30/09/2011 0.4%) of the total consolidated assets of the Banking Group.

14. Credit Related Commitments and Contingent Liabilities

Total contingent liabilities	**2,824**	2,840	2,805

The Banking Group guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties, including its Ultimate Parent Bank. To reflect the risk associated with these transactions, they are subjected to the same credit origination, portfolio management and collateral requirements as for customers that apply for loans. The contract amount represents the maximum potential amount that could be lost if the counterparty fails to meet its financial obligations. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

Other contingent liabilities

The Banking Group has other contingent liabilities in respect of actual and possible claims and court proceedings. An assessment of the Banking Group's likely loss in respect of these matters has been made on a case-by-case basis and provision made where deemed necessary.

15. Subsequent Events

On 2 February 2012 the Bank exercised its option to repay, on 2 March 2012, $250 million of loan capital with an original maturity of 2 March 2017.

On 14 February 2012 the Bank's Board resolved to pay an ordinary dividend of $550 million no later than 31 March 2012.

Work to move to a single banking platform, as announced in November 2010, is well advanced, with testing and integration work expected to be completed later this calendar year. The Board of Directors of the Bank has approved additional expenditure for completion of the programme of around $110 million in technology and related costs.
